

Award winning researchers in Earth Sciences¹

Congratulations to our researchers who have recently won awards.

Professor David Hodell has been awarded the 2018 EGU (European Geosciences Union) Milankovich Medal for outstanding research in long term climatic changes and modeling.

Dr Marie Edmonds has been awarded the 2017 Wager Medal by the IAVCEI (International Association of Volcanology and Chemistry of the Earth's Interior) for outstanding contribution to volcanology.

Dr Helen Williams has been selected as a Mineralogical Society Distinguished Lecturer for 2017-18 and will deliver a series of lectures on her work using non-traditional stable isotope systems.

Dr Davide Novella was awarded the 'Angelo Bianchi' Prize of the Italian Society of Mineralogy and Petrology for young researchers in petrology.

Euan Mutch was given an Exceptional Student Presentation Award at the recent IAVCEI Scientific Assembly in Portland, Oregon.

Well done all!
